

Israeli Counter Terrorism Course

Today's world is one of global terrorism and intercontinental terrorists. Their attacks, whether carried out in Bali, Iraq or Spain demonstrates a stark reality. Much of the operational methodology and many of the tactics they employ were developed in the Middle East. It is accurate to say that of the range of potential types of terrorist attacks facing North America, the vast majority were developed, tested and perfected in Israel. Consequently, no one has more relevant and real time experience preventing, combating, understanding and containing terrorism than do the Israelis.

Canadian Innovative Protective Solutions Inc. is pleased to announce this unique training opportunity to the Canadian Security and Policing communities. We invite qualified individuals to attend this comprehensive 5 day certification course. Written exam and certification upon completion, issued by SSTS. Successful candidates will have a basic understanding of the noted topics.

Who should attend?

Security Managers

The Presenter

Daniel (Danny) Sharon is a retired 28-year veteran of the Israeli Security Forces. His responsibilities have included the civil administration and jurisdiction of 35,000 residents of an area approximately 100 square kilometers. He is experienced in counter terrorism, intelligence, weapons, and body language. His achievements include being an Israeli Police Commander in the Golan Heights, the Bravery Medal Award, Police Officer of the Year Award, and the disarming of a suicide bomber, which led to the development of the Counter-action Manual. The presenter's fields of expertise are counter-terror evaluation, identification of suicide bombers, their containment and disarmament, operational behavior, body language, intelligence, airport and perimeter security, bomb management and containment planning, exposure and infiltration into criminal and terrorist organizations, and training police forces and security personnel.
